

BöttcherPro EK

Decalcifying Gel

Cleaning gel which removes stubborn calcium contamination on ink rollers.
BöttcherPro EK solves glazing, which results from paper lint residues.

Application

- based on solvents, acids and auxiliaries
- flash point > 100 °C
- water miscible, free of aromatics and CFC's
- good cleaning performance for removing calcium contamination and paper lint residues
- restores the original roughness and colour pick-up of the rollers
- regular application (once weekly) prevents calcium build-up on ink rollers
- prolongs roller life

Features

After washing with a Böttcher roller wash, apply BöttcherPro EK on the roller, with the roller running slowly. The dissolving process will be completed after 3 to 5 minutes, then wash off with water.
Repeat as necessary.

Note

 1 litre bottle

Package

BöttcherPro EK is classified and marked in accordance with EC-Directive 1999/45/EC - in its latest version. BöttcherPro EK is not a dangerous good in the sense of national and international transport regulations.
