

BöttcherFount N-1004 GS

Fountain Solution Additive

BöttcherFount N-1004 GS is a fountain solution additive for newspaper printing with effective plate protection and improved wetting. Particularly for soft water.

- osage range 2 3 % volume
- reduced and stable water pick-up of the ink, therefore high ink density obtained
- very stable ink-/water-balance
- reduction in water setting
- orier copy, improving post press operations
- clean, quick restarts of the printing plate
- reduced build-up of ink on dampening rollers
- for water hardness 0 10° dH (total hardness)
- pH-value for soft water 4.5 to 5.0
- corrosion inhibited
- 💲 reduced build-up of paper dust and ink on the blanket
- on the blanket no sticky residue on the blanket
- no ink feedback into fountain solution
- effective prevention of foam
- increased conductivity per % input: 400 μS/cm
- density 1.08 (kg/l)

Before applying BöttcherFount N-1004 GS, the fountain system must be completely emptied and cleaned thoroughly, preferably with BöttcherPro Hydroclean.

Note

- 200 kg container
- 1000kg container

BöttcherFount N-1004 GS is classified according to EC-Directive 1999/45/EC - in its latest version and does not need to be marked. BöttcherFount N-1004 GS is not a dangerous good in the sense of national and international transport regulations.
